

## CPC Long-lasting Rust Preventive Oil

- CPC Long-lasting Rust Preventive Oil is an oil film type rust preventive oil, which provides long-lasting temporary rust prevention indoors, or storage in shelter outdoors for mechanical tools, parts, and equipment.
- The flash point of CPC Long-lasting Rust Preventive Oil is much higher than solvent-typed rust preventive oil, and is much safer to apply.
- This oil can be applied by methods of spray, hand, or dipping, and should be worked in location with good ventilation. Before applying it, to reach the maximum effectiveness, contaminants on metal surfaces such as, dusts, dirt, oil stains, should be thoroughly cleaned. Kerosene, dry-cleaning solvent, or gauze can be used to remove the film after applied.
- Do not store or use this oil in high temperature environment, and seal the drum opening all the time when not use it.
- Packages : ①liter in bulk ◦  
②200 liters drum ◦
- The typical data are listed as following:

Viscosity Grade, ISO VG	3
Sp. Gr., 15.6°C/15.6°C ,D4052	0.8213
Sp. Gr., 25°C/25°C , D4052	0.8170
Viscosity Kin., cSt @40°C, D445	3.36
Color, D1500	3
Flash Point, PMCC, °C, D93	101
Pour Point, °C, D97	-30
Acid Number, mg KOH/g, D664	1.33
Saltwater Immersion Test, MIL-PRF-21260E	No rust
Humidity Cabinet Test, days to failure, D1748	30+
Water Displacement, 25°C, 1hr, MIL-PRF-16173E	pass
Salt-Fog Spray Test, hrs, B117	16+
Product No.	LA72951

Note: Typical properties are based on standard tests under laboratory conditions. Variations that do not affect product performance are to be expected during normal manufacture. Please consult your local CPC representative if you have any questions.
